WORK EXPERIENCE

QA Automation Engineer - SDET
Stori

08/2023 - Present   *Remote - CDMX, Mexico*
Fintech unicorn
Logros/Funciones

- QA Manual: API testing AWS lambda (Postman & Proxy), Feature flagging (Apptimize, Firebase(Dynamics links, App distribution)), AppFlyer, Track metrics/logs braze, amplitude, cloudwatch, grafana, Simulator xcode, testflight, check db with VPN, slack, Android Studio Apk's & Emulators.
- QA Automation: Appium IOS/Android, performance (MeterSphere). Remote multicultural team.

Specialized adviser QA Manual & Automation
Xcapit

02/2020 - 08/2023   *Remote - Cordoba, Argentina*
Wallet multichain Blockchain
Achievements/Functions

- Blockchain: I deploy smart contracts for testing using Solidity and Hardhat on Sepolia. I scan networks such as ETH, Bitcoin, Polygon and Solana, read tx's, and execute scripts (send tokens/generate mnemonics). I mint on OpenSea and have expertise in web3, encompassing Dapps, Metamask, defi, gas, fees, WalletConnect, swaps, faucets and more.
- Manual QA specialized in API testing with Postman/Insomnia, proxy manipulation such as MITM/Proxyman, and proficient with Firebase for events, notifications, and feature flags. Security tools in Kali Linux, reporting in Jira, and various testing methodologies. Also participates in Scrum Events and validations in Figma.
- Development of E2E automation project with POM with Docker Selenium(Web) Python and report with allure, and the same stack with Appium for mobile. Cyprees for puntual cases.
